

Co-Brand

Quick reference guide

Version 1.2

November 2024

Go to nsw.gov.au/branding for the full brand guidelines.

Logo NSW Government

Our primary logo

Made up of the Waratah icon and the full NSW Government wordmark, our primary logo should be used in most cases, where size permits.

Small use logos

Two small-use logos are available to ensure legibility at all sizes. Guidance on when to use these logos is available in the brand guidelines.

Clear space

We use a clear space that is 100% of the width of the 'N' across all applications (except when used in app icons, or social media profiles).

Logo dos

- Ensure the logo is placed on backgrounds that allow for sufficient contrast and legibility.
- Ensure the logo has sufficient clear space.
- Ensure the appropriate sized logo is used for your application.

Logo don'ts

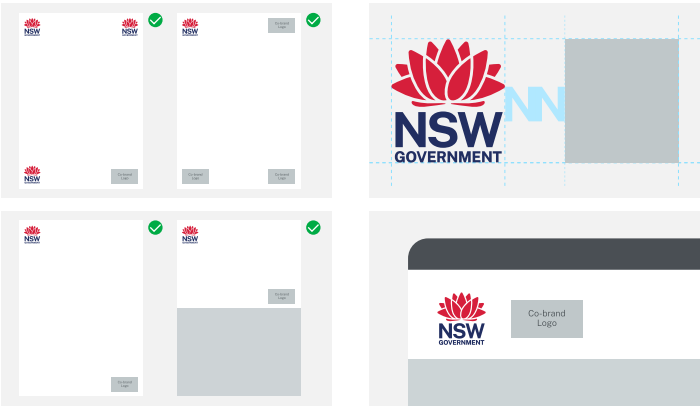

- Place the logo on busy or patterned backgrounds.
- Separate, stretch, rotate, change the scale or colour of any of the logo elements.

Logo Co-brand

Size and positioning

The NSW Government logo and co-brand logo should be visually equivalent in size.

The NSW Government logo should always appear first, e.g. to the left and/or above the co-brand logo.

Decoupled

In most applications these two logos are decoupled and anchored to separate corners of a page or panel.

Coupled relationship

In some applications, such as website headers and email signatures, the logos can be coupled.

Typography

Our primary typeface

Public Sans is a free, open source typeface, to be used in all communications, that makes information clear and easy to read.

The Public Sans family is available in 8 weights and two styles (roman and italic).

Alternative typefaces

Where Public Sans is not available, our alternative typeface is Arial.

When translating content, if Public Sans does not support a language, choose the most accessible and appropriate typeface available for that language.

Colour

Specifications

The print and digital colour values for our palette can be found below.

White	
RGB	255/255/255
HEX	#ffffff
CMYK	0/0/0/0

Grid and layout

The grid

A flexible 12 x 12 grid is the framework for all our visual elements and typography. No matter the application, the grid gives you the necessary structure and guidance so you can focus on your creative idea.

The grid can be constructed with and without margins and gutters, and can be divided to create simpler 2, 3, 4 and 6 column configurations to suit your application.

Guidance on how to construct and use the grid is available in the brand guidelines.

Line system

Hairlines and bands can aid in the structure and organisation of content. They can be used in combination with each other as well as, vertically or horizontally.

Hairlines define boundaries or segment information and can be fully extended or dynamic to content.

Bands bleed and can be used to highlight information, add colour or hold photography or illustration.

Iconography

System / UI icons

We use Google's open source library for our UI icons. These icons are available in different styles and can be downloaded at fonts.google.com/icons.

Pictograms

Our pictograms can be represented in four different ways: line, line with accent, fill and fill with accent.

Guidance on creating bespoke or choosing ready-made pictograms are available in the brand guidelines including style, colour and usage.

App icons

There are two different approaches that can be used for app icons, depending on how closely associated the app needs to be with NSW Government.

1. Co-brand logo

When an app is the only or core app for a co-brand entity, it should use the co-brand logo as its app icon.

2. Standard icons

This is our default approach and should be applied in the majority of circumstances.

Guidance on how to create these icons are available in the brand guidelines.

Illustration

Principles

Our illustration principles define our overall approach and perspective to illustrations across our brand:

Vibrant, human, diverse, meaningful, clear and uniquely NSW.

We might not always tick all of these boxes, but these overarching ideas help define what fits within our style, and what doesn't.

Illustration style

To ensure our communications are both appropriate and engaging we have a flexible approach to illustration

While there is no single illustration style, they utilise our colour palette create cohesion across communications.

Below are a few examples of some different approaches.

Keyline

Flat colour

Realistic

Hand drawn

Geometric

Modular

Isometric

3D

Photography

Photographic approach

The following principles will help guide us in capturing content that reflects the lived and shared experiences of our people and places.

True to place

Our photography shows real landscapes and Australians in their environment to highlight the genuine nature and character of NSW.

Expressive diversity

Our photography showcases the full spectrum of NSW through diversity in perspective, subject, and visual tone.

An editorial approach

Our photography captures meaningful experiences and interactions in a way that is considered, striking and memorable.

Photography don'ts

- Do not choose images that feel unnatural, clearly staged, overly stock or cliché.
- Do not choose imagery that is not of NSW.
- Don't over-treat images or apply filters that feel unnatural, e.g. over-exposing, coloured effects.
